Professional Summary

Motivated Computer Science undergraduate with hands-on experience in AI/ML, IoT-based systems, and real-world project development. Skilled in Python, machine learning, and computer vision, with experience building predictive models and interactive dashboards. Actively exploring scalable AI applications through hackathons, internships, and self-driven projects.

Education

Bachelor of Technology in Computer Science

NIIT University, Neemrana | **CGPA: 8.14** | 2024 – Present

Class XII

Birla Vidya Niketan, New Delhi | **70.8%** | 2024

Work Experience

Operations and Technology Intern

Ipsita Insurance Services Pvt. Ltd. | May 2025 – Aug 2025

- Assisted in digitising records, organising datasets, and improving internal documentation.
- Performed basic data analysis and reporting to support operational efficiency.
- Gained exposure to professional workflows, compliance processes, and business operations.
- Earned industry-recognised certifications: **NISM** and **IC-38**.

Projects

Smart Study Companion

Built a Python-based desktop application featuring study scheduling, Pomodoro timer, flashcards, progress tracking, analytics, and AI-powered assistance using Tkinter.

Cattle & Buffalo Classification System (Smart India Hackathon)

Developed an image classification system to identify livestock breed and gender using preprocessing, feature extraction, and ML models.

Livestock Monitoring System (Hackathon Project)

Designed an IoT + AI system to monitor livestock health using real-time sensor data and visual analytics.

Pet Analytics System (Hackathon Project)

Built a hardware–software integrated analytics platform for real-time pet health and behaviour monitoring.

Water Quality Prediction & Recommendation System ([GitHub](#))

Developed an ML system to classify potable vs non-potable water, performed comparative model analysis, handled class imbalance with SMOTE, and deployed a dashboard with disease risk mapping and recommendations.

Skills

Programming: Python, C++, Java

AI / ML: Machine Learning, Model Evaluation, Data Preprocessing

Web: HTML, CSS, JavaScript

Data: NumPy, Pandas, Matplotlib, Seaborn

Tools: Git, GitHub, APIs

IoT: Sensor Data Handling, Hardware Integration (Beginner)

Soft Skills: Communication, Problem-Solving, Critical Thinking, Teamwork, Time Management

Achievements

Qualified for Round 2 of the **Idea One National One Health Hackathon**, held at Manipal University Jaipur, by developing an AI + IoT-based Pet Analytics System.

Hobbies & Interests

- Hackathons and project-based learning
- Self-learning in AI/ML and software development
- Fitness and discipline training
- Guitar and music learning
- Reading and journaling
